

The Certified Rigger

COWHIDE LEATHER

VEND READY PACKAGING

PART NO. GWORX600V

PACKAGING

12 pairs per inner pack / 72 pairs per carton

SPECIFICATIONS

PART NO. GWORX600
LINER Cowhide Leather

SIZING & FIT

AVAILABLE SIZES
S/7, M/8, L/9, XL/10, 2XL/11

DEXTERITY LEVEL
Maximum Dexterity Level 3
Certified under AS/NZS 2161.2

PACKAGING

12 pairs per inner pack
120 pairs per carton

REACH COMPLIANCE

Required Safe pH Level
Certified under AS/NZS 2161.2

AZO Dye and Irritant Chemical Free
Certified under AS/NZS 2161.2

SUN PROTECTION

UPF50+ Sun Protection
Pass under AS/NZS 4399 Sun Protective Clothing.
Tested by Australian Radiation Protection And Nuclear Safety Agency (ARPANSA).

GLOVE CARE

Do not wash these gloves
Remove excess dirt manually
Drip dry if wet

PERFORMANCE STANDARDS

EN388:2016 EN388:2003

3144X

3143

CERTIFICATION

Australian Standard
AS/NZS 2161.2:2005
AS/NZS 2161.3:2005
Lic. BMP 719034

FEATURES

- ▶ Only premium cowhides are selected and used in this glove to ensure the most soft and supple finish possible
- ▶ Wing thumb and stitch-free palm for increased durability and dexterity
- ▶ Double stitched in high wear areas for durability
- ▶ Gathered elastic strip at the back of the wrist for the perfect fit
- ▶ Chemical free production for wearer peace of mind
- ▶ Colour coded cuff for size identification
- ▶ Fast fit cuff for convenience
- ▶ UPF50+ offering maximum sun protection

INDUSTRIES

- ▶ Construction
- ▶ Logistics & warehousing
- ▶ Mining
- ▶ Rigging
- ▶ Timber & forestry
- ▶ Shipping

WHY CERTIFY A GLOVES MECHANICAL SCORES?

Although AS/NZS hand protection standards are aligned with European Standards as per the table below, there is no mandatory requirement for manufacturers who supply the Australian and New Zealand market with safety gloves, featuring EN performance ratings for attributes such as cut and chemical resistance, to provide evidence of testing and certification by an accredited Notifying Body.

- ▶ **AS/NZS 2161.2 = EN420 General requirements**
- ▶ **AS/NZS 2161.3 = EN388 Protection against mechanical risks**
- ▶ **AS/NZS 2161.4 = EN407 Protection against thermal risks (heat and fire)**
- ▶ **AS/NZS 2161.5 = EN511 Protection against cold**
- ▶ **AS/NZS 2161.10 = EN374 Determination of resistance to permeation by chemicals**

In Australia, glove manufacturers can undertake their own testing and issue their own compliance statements. In Europe this is not the case - All products designed to protect against medium-level risks, described by the EU as Category II & III are subject to mandatory testing and certification by accredited testing authorities.

These stark differences have potentially serious implications, without certification by a Notifying Body all product & performance claims cannot be independently verified. If they are not as claimed, they could have safety implications for the wearer and legal implications for the supplier or even the employer who provides the said PPE.

The Force360 and Graphex® ranges of hand protection are Certified by BSI Group to not only Australian Standards AS/NZS 2161:2005 but also all relevant European Standards including the latest EN388:2016 Standard.

Certification is not proof that a business has 'passed a test', it's proof that a business is constantly maintaining the highest of standards, a feat that demonstrates a deeper commitment to going above and beyond.
