

DIPOD 3M

THE DIPOD ROOFTOP SYSTEM is a 3 m (10 ft) high fixed rooftop solution designed for installation of any kind of panel antenna, small radio link or other common telecom equipment. This version is optimized for high stability.

FLEXIBILITY
The dipodsystem is a system with the capability of handling all possible roof inclinations. The supports are bolted through the roof to ensure a firm anchoring. The antenna mounting tube is supported by two stays to ensure stability.

QUALITY
The mounting tube and support tubes with brackets are made of anodized aluminium. This gives the system excellent corrosion resistance and a long life. A 3 mm (0,12 in) EPDM rubber sheet is placed under the Supports to protect the roof.

EASY ASSEMBLY
The choice of materials makes the product very light which makes the handling and installation very easy.
